### Corrigendum to: *Fungal Diversity*

<https://doi.org/10.1007/s13225-025-00567-w>

The authors wish to make corrections to above-mentioned article.

(1) During the process of phylogenetic tree labeling, we used formal culture collection numbers to replace some early stage working numbers. In this course, “LC22527” was inadvertently mistakenly pasted over the working number “XZ-QP465”. Thus, we stated that in Fig. 10 (page 14), the strain number “LC22527” should be replaced with “XZ-QP465”.

(2) The strain information of LC20580 was incorrectly placed in the “Materials examined” section of *F. equiseti* on page 16. Thus, we stated that the strain information of LC20580 should be listed in the “Materials examined” section of *F. neoequiseti* on page 23.

(3) In the originally published version, **Supplementary Table S1** lacked information of several strains. The missing information has now been added, and the **corrected Supplementary Table S1** is provided in the updated Supplementary Information accompanying this Corrigendum. These corrections **do not affect the results, interpretations, or conclusions** of the article.

The authors apologize for any inconvenience caused.

### Supplementary Information

The online version of this Corrigendum contains the **updated Supplementary Table S1**, which replaces the previous version.
